

Overview

Advanced Bank Risk Analysis seminar is a three-day course that provides you with a structured framework for the comprehensive analysis of bank risk profiles in both developed and emerging markets. It builds on Fundamentals of Bank Credit Risk Analysis, although that course is not a prerequisite.

The seminar begins by introducing a quantitative and qualitative analytical framework, and considers the various accounting rules and regulations specific to the sector. The course then dives into the bank operating environment, profitability measures, capital issues, and notching. After examining credit, market, liquidity, and management risks, real bank failures are investigated to uncover insights. The course concludes with a comprehensive exercise that incorporates all topics covered. A combination of short presentations, discussions, exercises, and case studies.

Who Should Attend?

This seminar is suitable for professionals from the financial services industry from a wide variety of backgrounds, including:

- » Investment bankers, commercial bankers, and credit risk management professionals
- » Credit and equity analysts
- » Regulators and central bankers
- » Fixed income professionals
- » Bond researchers (both buy and sell sides)
- » Corporate treasurers
- » Correspondent banking officers
- » Relationship managers

Course Benefits

By the end of this seminar, you will be able to:

- » Apply a structured framework to analyze banking institutions.
- » Identify and interpret key ratios.
- » Evaluate a bank from its published financial information.
- » Understand the objectives of bank regulations and capital standards.
- » Analyze various elements of regulatory capital, including hybrid securities.
- » Detect early warning signals of deteriorating credit quality.
