NEW YORK, December 14, 2011— Moody's Analytics, a leader in risk measurement and management, has been named best Basel III solution provider by the readers of *Risk* magazine. Also named a top risk management vendor, Moody's Analytics came in first in the Basel III, regulatory capital calculation and regulatory compliance and reporting categories. The recognition of Moody's Analytics was part of the 2011 Risk Technology Rankings, an industry-respected award where the winners are chosen by the readers of *Risk* magazine, a financial risk management publication with a circulation of more than 6,000 print and 33,000 web readers.

"We are honored that the readers of *Risk* magazine have recognized Moody's Analytics as the best Basel III solution provider," said Robert Dutcher, Senior Director, Moody's Analytics. "Our clients are facing increased pressure from regulators and looking for assistance from us. To meet this demand, we have invested heavily in our advisory and consulting services as well as in engineering to build a world class Basel III capital calculation and reporting solution."

To help financial institutions comply with Basel III, Moody's Analytics launched [RiskAuthority](#), its next generation Basel III solution. Developed specifically for banks, credit institutions and clearing houses, RiskAuthority's integrated risk platform helps financial institutions comply with regulations by centralizing Basel III capital and liquidity risk data. RiskAuthority calculates regulatory capital, leverage and liquidity ratios and displays the results in a flexible and intuitive manner.

Moody's Analytics also provides a wide range of integrated risk management products, including a comprehensive regulatory capital management and reporting solution for insurance companies. The solution helps insurers calculate their solvency capital requirement and comply with Solvency II regulatory reporting requirements.

The winners of the 2011 Risk Technology Rankings will be featured in the December 2011 edition of *Risk* and on the *Risk* web site: [www.risk.net](http://www.risk.net).
