MOODY'S ANALYTICS LAUNCHES MOODY'S CREDITVIEW – U.S. PUBLIC FINANCE

NEW YORK, April 30, 2013 — Moody's Analytics today announced the launch of Moody's CreditView – U.S. Public Finance, an innovative solution that offers credit professionals a comprehensive and streamlined view of municipal ratings, research, key credit metrics and economic data and commentary. This holistic view provides insight into an issuer, obligor or sale with a new, easy-to-navigate interface.

"The launch of Moody's CreditView – U.S. Public Finance underscores our commitment to innovation, product development and improving the client experience," says Andrea Blackman, Managing Director, Product Strategy and Marketing for Moody's Analytics. "By offering a consolidated view of our ratings and research, market participants can quickly identify and manage credit risk and opportunities."

Moody's CreditView – U.S. Public Finance includes a streamlined bond selection tool that displays both issuer and obligor. Users can scan the issuers, obligors and sales more quickly and easily, without having to switch between multiple views. The latest addition also includes data and commentary from Moody's Analytics Economic and Consumer Credit Analytics team, including Précis state and metro-area data and commentary on strengths and weaknesses as well as Dismal Scientist US Macro and Regional Outlooks.

Moody's CreditView – U.S. Public Finance is the latest service offering in Moody's Analytics product roadmap, which began four years ago with the redesign of Moodys.com. Since then, Moody's Analytics enhanced its research offerings, launched Moody's CreditView – Fundamental in 2011 and Moody's CreditView – Structured Finance in 2012.
