### DEVELOPMENT BANK OF THE PHILIPPINES APPOINTS MOODY'S ANALYTICS AS STRATEGIC TRAINING PARTNER

**HONG KONG – September 30, 2013** – Moody's Analytics (Moody's) – a division of Moody's Corporation – is pleased to announce that it has been selected by The Development Bank of the Philippines (DBP) as a strategic partner in implementing a rigorous eLearning training and simulation program for the bank's commercial lending staff.

"It is a great privilege for us to partner with such a venerable policy bank in helping to raise competency levels across the organization," says Ari Lehavi, Head of Moody's Analytics' Training and Certification Division. "The bank's commitment to fostering a culture of risk awareness and competence is commendable and in line with best practices among leading institutions worldwide."

By deploying Moody's online training and simulations solutions, DBP seeks to ensure that its credit officers are better able to serve the needs of customers with a deeper understanding of their financial needs and risk profile. In the process, the bank expects to sharpen credit decisions and enhance its overall risk management infrastructure.

Moody's Commercial Lending eLearning curriculum is uniquely designed to ensure that credit practitioners can apply their acquired knowledge and skills in real life scenarios. The program contains lessons and simulations that help lenders master the competencies required to make sound and informed credit decisions.

This training partnership between Moody's and DBP represents a deepening of an ongoing collaboration between the two companies; DBP currently utilizes Moody's Analytics Enterprise Risk Solutions. The partnership further builds upon Moody's position in Asia as the leading provider of credit risk training solutions and risk management systems to the region's financial institutions.
