### MOODY'S ANALYTICS ADDS GLOBALLY COMPARABLE BANK FINANCIALS

NEW YORK, April 8, 2014 — Moody's Analytics, a leader in risk measurement and management, today announced the enhancement of Moody's CreditView with the addition of Bank Financials and Analytics. This platform helps Moody's global research customers to compare banks, on a like-for-like basis, across regions and accounting regimes.

"The range of national and regional differences in banks makes direct comparisons of relative performance a challenge. By applying our comprehensive analysis to reported financial data, Moody's Analytics Bank Financials and Analytics helps our customers compare bank performance globally," says Andrea Blackman, Managing Director for Moody's Analytics.

Bank Financials and Analytics includes coverage of more than 2,000 rated banks and analyst-adjusted financials, together with an easy-to-use interface. This additional content, integrated with ratings, research and market signals in Moody's CreditView, provides credit professionals with a platform to perform comprehensive bank credit analysis.

Bank Financials and Analytics is the latest service innovation from Moody's Analytics, building on the launch of Moody's CreditView in 2011. Moody's CreditView has delivered multiple perspectives on Corporate, Bank, Insurance, Sovereign, Structured Finance and US Public Finance credit to Moody's research customers.
