MOODY'S ANALYTICS WINS AWARDS FOR BEST SOLVENCY II SOLUTION, BEST DATA MANAGEMENT SERVICE

London, 3 December 2014 – Moody's Analytics, a leader in risk measurement and management, has been named Best Solvency II Solution and Best Data Management Service provider by *Insurance Risk* magazine. The awards recognize Moody's Analytics' RiskIntegrity™ Suite for its ground-breaking approaches to solving risk management challenges facing the insurance industry.

Rob Mannix, Editor of *Insurance Risk* stated, "We have selected Moody's Analytics' Solvency II solution because it is the most complete end-to-end software solution for insurance compliance."

Moody's Analytics' RiskIntegrity™ Suite helps insurers measure solvency and risk exposures and comply with all three pillars of Solvency II. It offers a comprehensive, end-to-end solution, enabling solvency capital requirement calculations, risk type aggregation, and regulatory and business reporting from a centralized data management platform. The modular software can be tailored to support the unique needs of different firms, from small businesses to large multinational enterprises.

"We are delighted that our RiskIntegrity™ Suite has been recognized by *Insurance Risk* as the premier Solvency II solution. Our product is enjoying broad adoption around the world because it offers an end-to-end solution tailored to each insurer's individual needs, and can be integrated with existing systems to enable compliance with all Solvency II requirements," said Colin Holmes, Managing Director at Moody's Analytics.

RiskIntegrity includes the languages, formats and templates required for Solvency II compliance and covers all EU supervisors. Moody's Analytics monitors national regulations as they evolve and updates RiskIntegrity to reflect new requirements, saving insurers the time and effort of building and maintaining their own library of regulatory reports.
