NEW YORK, April 27, 2015 – Moody's Analytics, a leader in risk measurement and management, announced today that it has been selected as the top Regulatory and Economic Calculation provider in Structured Products' 2015 Technology Rankings. The rankings, based on a survey of readers, identify the best structured finance technology products in a number of categories, including market and credit risk, pricing and analytics, risk management and trading systems.

For the second consecutive year, readers recognized Moody's Analytics' risk management and cash flow platform, WSA Desktop, for its strength in helping structured finance investors and risk managers meet regulatory demands and risk management challenges. WSA Desktop provides loan, pool and performance data for structured securities, along with detailed economic, credit and cash flow analyses. WSA Desktop can also monitor, price and stress test portfolios, assess performance and automate reporting.

"We are honored that the readers of Structured Products Magazine have again recognized Moody's Analytics as the premier provider of solutions for regulatory, economic and risk management professionals," says Luis Amador, Managing Director at Moody's Analytics.

Moody's Analytics provides risk management software, models, data and services to leading financial institutions worldwide. Moody's Analytics recently added a Regulatory Module to its Structured Finance Portal to help financial institutions meet regulatory requirements of all securitized assets in their portfolios. The product provides pre-calculated Supervisory Formula Approach (SFA) metrics for thousands of tranches of structured securities.
