Moody's Analytics wins two categories in 2017 Chartis RiskTech100®

Firm also secures number five overall ranking

NEW YORK, December 22, 2016 — Moody's Analytics today announced that it has won the Enterprise Stress Testing and Credit Risk categories in the 2017 Chartis RiskTech100® rankings. The company also claimed the number five position overall in these prestigious annual rankings.

Moody's Analytics Stress Testing Suite has now earned the top position in the Enterprise Stress Testing category for two consecutive years. In the Credit Risk category, this year's win is the fourth for Moody's Analytics since 2010, recognizing the company's RiskFrontier™ and RiskCalc™ solutions. Moody's Analytics has now earned a top-ten RiskTech100® ranking for nine straight years.

"Moody's Analytics continues to enhance its offerings to meet its clients' evolving regulatory and risk management challenges," said Peyman Mestchian, Managing Partner at Chartis. "The breadth of Moody's Analytics solutions is reflected in its overall ranking, while the company's innovative stress testing and risk measurement tools drove two category wins."

In addition, the 2017 RiskTech100® rankings recognized several other Moody's Analytics offerings. Among them were the Moody's Analytics RiskAuthority™ and RiskConfidence™ solutions, and the RiskIntegrity™ Suite. The Moody's Analytics Structured Finance Portal and CreditEdge™ platform were recognized, and various financial training and credit research solutions also factored in to the rankings.

"We're proud to be recognized as an industry leader in this year's RiskTech100® rankings," said Steve Tulenko, Executive Director - Enterprise Risk Solutions, "and we appreciate our clients around the globe who value those solutions."

Now in its 11th year, the RiskTech100® evaluates technology companies that provide risk and compliance solutions to financial institutions. It utilizes assessment criteria in six equally weighted categories: functionality, core technology, organizational strength, customer satisfaction, market presence and innovation. For this year's report, Chartis completed more than 1,500 surveys and interviews with risk technology buyers and end users, and collated more than 400 completed questionnaires, briefing documents, and product specifications from risk technology vendors.
