## Moody's Analytics examines impact of disruptive technologies on financial sector in newest *Risk Perspectives*

New York, August 7, 2017 – Emerging technologies are changing how we approach risk management in banking. In this edition of [Moody's Analytics Risk Perspectives](#), our theme is managing disruption, helping risk practitioners respond to the challenges and opportunities presented by disruptive technologies.

"We are operating in a constantly changing environment – whether from evolving regulations, new technologies, or other forces. The ability to manage change is an ever more critical skill for risk professionals," said Anna Krayn, Editor-in-Chief of *Risk Perspectives*, the company's flagship publication. "In this edition, our experts address such topics as: How does machine learning impact the commercial loan credit risk assessment process? How are data quality and productivity in risk management related? How can banks adapt their small business lending strategies to compete with alternative lenders?"

With this edition, *Risk Perspectives* has been expanded to include an op-ed section. This section features practitioners writing on issues such as the effects of innovation on financial services, the impact of ride-sharing services on auto production, and new approaches to risk management as Dodd-Frank stress testing matures.

You can access [Risk Perspectives](#) online at no cost. Other articles in this issue include:

- [Machine Learning: Challenges, Lessons, and Opportunities in Credit Risk Modeling](#)
- [When Good Data Happen to Good People: Boosting Productivity with High-Quality Data](#)
- [Battle for Small Business Capital Access: Traditional vs. Alternative Lenders](#)
- [Accounting for Purchased Credit Deteriorated Financial Assets: Current and Future GAAP](#)

### Announcing the new [MoodyAnalytics.com](#)

This edition and all previous editions of *Risk Perspectives* are available on the new [MoodyAnalytics.com](#) website. Moody's Analytics redesigned its site around market needs to deliver clearer visibility into the company's [award-winning solutions](#) and [unique insights](#).

Site visitors now enjoy a more personalized and mobile-friendly user experience, along with access to *Risk Perspectives* and a wealth of other Moody's Analytics expertise. Thought leadership from the company's extensive research library is integrated throughout the site, totaling more than 800 articles, whitepapers, videos, and webinars-on-demand.

Michelle Adler, Managing Director – Global Marketing and Events, said: “The new site aligns our solutions, services, and research to offer visitors from all segments of the financial industry actionable information they can use to inform better business decisions.”
