Moody's Analytics wins big in Risk.net Markets Technology Awards

LONDON, November 30, 2017 – Moody's Analytics Insurance solutions have won three categories in the 2018 Risk.net Markets Technology Awards: Solvency II Product of the Year, Economic Scenario Generation Product of the Year, and Regulatory Reporting Product of the Year (Insurance). Moody's Analytics also won Best Stress Testing Product of the Year and were named *Risk's* 2018 Technology Vendor of the Year.

The Moody's Analytics RiskIntegrity™ Suite, our comprehensive [Solvency II solution](#), was recognized for helping insurers meet the calculation, data, and reporting requirements of Solvency II. The modular solution offers both standard-formula and internal-model approaches to support insurers with automation of regulatory capital calculations and reporting.

Our [Regulatory Reporting for Insurance solution](#) earned Regulatory Reporting Product of the Year (Insurance) by making reporting for Solvency II and other frameworks easier and less time consuming. It supports the European Insurance and Occupational Pensions Authority's reporting standards and provides full audit control throughout the reporting process. The tool's automated validation rules help ensure the quality and coherence of reports, which the platform then automatically collects, processes, and submits to regulators.

Winning Economic Scenario Generation Product of the Year reflects how insurers are benefiting from using our [Economic Scenario Generator](#) ("ESG"). The ESG helps firms assess group-wide economic and regulatory capital, develop capital management strategies, and price complex embedded guarantees and options. Insurers, asset managers, and investment advisory firms use the ESG for modelling and stress and scenario testing for deeper insight into investment strategies and risk.

"We're delighted by our excellent showing in the Markets Technology Awards," said Colin Holmes, Managing Director of Insurance Solutions at Moody's Analytics. "Winning three categories underscores the value our clients find in our solutions, whether we're helping them meet regulatory requirements, optimize their operations, or gain insight to guide their business strategies."
