Bank DKI to enhance credit assessment training with Moody's Analytics Credit Coach

JAKARTA, March 28, 2018 – Jakarta-based Bank DKI and Moody's Analytics, a leading provider of financial intelligence and learning solutions, today announce their collaboration to enhance credit education for employees of Bank DKI. As part of this collaboration, all of Bank DKI's commercial lending staff will participate in the innovative [Moody's Analytics Credit Coach](#) program.

"Moody's Analytics combines expertise in credit assessment with tools to advance the skills and practices of credit professionals," said Farel Silalahi, a member of Bank DKI's Board of Directors. "The Moody's Analytics Credit Coach solution will support our employees' ability to source, appraise, and monitor loans in accordance with best practices and our risk management guidelines."

The Moody's Analytics Credit Coach solution diagnoses skill gaps by evaluating each banker's responses to a series of questions related to a real-life lending scenario. Based on the results, the system prescribes a personalized learning path to help the banker achieve proficiency in areas that require further reinforcement. This individualized approach helps employees optimize their learning investment by focusing on the concepts that they need to strengthen.

"We are honored to collaborate with Bank DKI to help elevate the skills of their commercial lenders," said Ari Lehavi, Moody's Analytics Executive Director for Learning Solutions. "We look forward to implementing our innovative solutions at the bank and contributing to the enhancement of the bank's risk management practices."
