## Moody's Analytics takes top position in Chartis CECL report

NEW YORK, June 8, 2018 – Moody's Analytics, a leading provider of financial intelligence, has differentiated itself among category leaders in a new Chartis Research report that evaluates 17 vendors offering Current Expected Credit Loss (CECL) solutions. We earned this distinction for our cloud-based [ImpairmentStudio™](#) solution, which automates and simplifies the complex processes needed to meet the new accounting standard.

"We're honored that Chartis has recognized our best-in-class capabilities," said Eric Ebel, Managing Director at Moody's Analytics. "With the ImpairmentStudio solution, firms can apply our technology to meet the new CECL requirements more efficiently and gain meaningful insight into their business."

The ImpairmentStudio solution combines our deep expertise in credit risk with best practices in accounting, delivered by our [award-winning technology](#). Firms can use it to meet the CECL standard and leverage our tools to enhance their analytic capabilities. What sets the ImpairmentStudio solution apart is how banks can gain real business value from using it for their CECL implementation – from improving their credit risk practices to gaining a fuller understanding of their operations, leading to better business decisions.

[CECL Technology Solutions 2018](#) is the first report Chartis Research has published on CECL solutions. It uses Chartis' FinTech Quadrant® methodology, which takes into account vendors' technology, product, and organizational capabilities while emphasizing the completeness of their offerings and their market potential.

In May, we earned the [top position](#) in Chartis' *Balance Sheet Management Technology 2018*, which evaluated 12 balance sheet management vendors. We also secured the top spot among 19 vendors in Chartis' [Technology Solutions for Credit Risk 2.0 2018](#), in the report's FinTech Quadrant® focusing on the banking book. Last year, we earned the [top position](#) among 16 insurance risk management system vendors in Chartis' *Risk Management Systems for the Insurance Industry: Market Update 2017*.

These accolades and our [other industry awards](#) help distinguish Moody's Analytics. They reflect the breadth and overall strength of our offerings, and how we are viewed by the market.
