## Moody's Analytics Partners with Paxata to Enable Self-Service Data Preparation for Financial Institutions

LONDON, July 24, 2018 – Moody's Analytics, a global provider of financial intelligence, has enhanced its data capabilities by partnering with Paxata, a leader in data preparation. Through this partnership, Moody's Analytics now offers financial institutions a self-service data preparation functionality to help them turn raw data into ready information instantaneously.

The Paxata data preparation platform integrates seamlessly with the Moody's Analytics [regulatory technology](#) suite of solutions, including our on-premise, cloud, and software-as-a-service (SaaS) offerings. It requires no coding or scripting, and works across a company's entire data set, giving business users trusted and confident results for their business analytics.

"Our decision to work with Paxata was driven by the holistic, responsive nature of their platform and the depth of user interaction it affords," said Yann Delacourt, Director of Product Management at Moody's Analytics. "We understand that accurate, up-to-date, and correctly formatted data is central to effective enterprise risk management. Our solutions already contain extensive data quality management tools for consolidation, results calculation, and reporting to ensure high-quality data standards. The integration of Paxata's data preparation platform within the Moody's Analytics suite of regulatory solutions will enable users to take greater control of this data step."

"We are delighted that Moody's Analytics has selected our data preparation tool to enhance its suite of regulatory technology solutions," said Chris Maddox, Co-founder and SVP Business Development and Alliances at Paxata. "As data volumes within financial institutions continue to increase, there is a growing need for companies to gather, profile, and prepare data across the business. Our self-service, scalable platform enables enterprises to intelligently and rapidly transform raw data into trusted insights."
