Moody's Analytics Wins at 2019 Markets Technology Awards

LONDON, November 29, 2018 – For the second straight year, Moody's Analytics has won Solvency II Product of the Year at the Risk.net Markets Technology Awards.

Our comprehensive Solvency II solution was recognized for helping insurers meet the calculation, data, and reporting requirements of Solvency II. This modular solution offers both standard-formula and internal-model approaches to help insurers automate their regulatory capital calculations and reporting.

"We're honored that our Solvency II solution has again been recognized as best-in-class in the Markets Technology Awards," said Colin Holmes, Managing Director of Insurance Solutions at Moody's Analytics.

Moody's Analytics has a long and successful track record of delivering and maintaining a wide range of compliance solutions, for example for Solvency II, CECL, IFRS 9, and now IFRS 17.

"We take great pride in delivering solutions that solve business-critical problems for our clients. This award is an endorsement of our approach to helping clients with complex regulatory requirements," added Mr. Holmes. "With the new IFRS 17 standard now being the key focus for the industry, we are applying our knowledge and understanding to help insurers address the new standard."
