## ivari Selects Moody's Analytics Solutions for IFRS 17 Implementation

**NEW YORK, September 25, 2019** – Moody's Analytics, a global provider of financial intelligence, announced today that Canadian insurer [ivari](#) has selected the Moody's Analytics [RiskIntegrity™ IFRS 17](#) solution and the AXIS™ IFRS 17 Link Module for its implementation of International Financial Reporting Standard (IFRS) 17.

The cloud-enabled RiskIntegrity IFRS 17 solution has the capabilities required for an efficient implementation of IFRS 17, supporting the needs of actuaries, accountants, and IT professionals. ivari will make use of the software-as-a-service availability to seamlessly integrate the solution into its existing infrastructure, connecting data, models, systems, and processes between actuarial and accounting functions.

The AXIS IFRS 17 Link Module enables clients of the Moody's Analytics [AXIS™](#) actuarial system, like ivari, to automate their IFRS 17 actuarial calculations and significantly reduce the run times required for their actuarial modeling under IFRS 17. The outputs can then be easily incorporated into the RiskIntegrity IFRS 17 solution.

"We are delighted that ivari has expanded its use of Moody's Analytics solutions to support its IFRS 17 project," said Brad Crafton, Senior Director of Actuarial Services at Moody's Analytics. "By licensing the AXIS IFRS 17 Link Module and RiskIntegrity IFRS 17 software in the cloud, ivari, a long-standing user of the AXIS solution, will benefit from ongoing cost savings, faster actuarial processing times, and greater flexibility with their IT infrastructure. We look forward to continuing our work with ivari and its IFRS 17 project team."

Earlier this year, Moody's Analytics was named a [Category Leader](#) in "IFRS 17 Technology Solutions: Market and Vendor Landscape 2019," a Chartis Research report that assesses 10 leading vendors of IFRS 17 solutions.
