Moody's Analytics Wins CECL Category in Chartis RiskTech100®

NEW YORK, November 20, 2019 – For the second straight year, Moody's Analytics has won the Current Expected Credit Loss (CECL) category in the Chartis RiskTech100®. It's one of [seven](#) categories we won this year to go along with a #4 overall ranking.

At the center of our [CECL solution](#) is the cloud-based ImpairmentStudio™ platform. It helps our clients meet their CECL requirements more efficiently, while delivering meaningful business insights. The platform combines Moody's Analytics credit risk data with our best-in-class analytics and deep experience in impairment accounting to let firms identify the risks, and opportunities, that CECL presents.

"We're honored that Chartis has again recognized our industry-leading CECL solution," said Eric Ebel, Managing Director. "With the ImpairmentStudio platform, our clients are able to automate and simplify CECL processes. Equally as important, they're able to look beyond the initial deadlines, at how CECL efforts can help strengthen their overall risk infrastructure."

Now in its 14th year, the RiskTech100® evaluates technology companies that provide risk and compliance solutions to financial institutions. Chartis analysts use a combination of sources to inform their decisions: user surveys, interviews with subject matter experts, customer reference checks, vendor briefings, and other third-party sources.

This win adds to our growing list of [awards and industry accolades](#).
