## Moody's Analytics Wins Five InsuranceERM Awards Including IFRS 17 Solution of the Year

LONDON, February 10, 2020 – Moody's Analytics has won five categories at the 2020 InsuranceERM Awards:

- [IFRS 17 Solution of the Year](#)
- [ESG \(Economic Scenario Generator\) Software of the Year](#)
- [ERM End-to-End Solution of the Year](#)
- [Regulatory Reporting Software of the Year](#)
- [Solvency II Solution of the Year](#)

These results continue our strong showings at the InsuranceERM Awards, following [three category wins](#) last year, [two wins](#) in 2018, and [two wins](#) in 2017.

This is the first year that these awards have included an IFRS 17 category. We won it on the strength of our [RiskIntegrity™ solution for IFRS 17](#), which comes with all the capabilities required to efficiently implement the new standard. Available as a software-as-a-service solution, it integrates seamlessly with an insurer's existing infrastructure to connect data, models, systems, and processes between actuarial and finance functions.

A unique combination of industry-leading modeling capabilities delivered through cloud-based enterprise software is at the heart of our IFRS 17 solution and helps distinguish Moody's Analytics from other vendors. More broadly, insurers around the world use our suite of solutions to address a broad range of challenges across actuarial, financial, and risk functions, reflected by the range of award categories in which we were recognized.

"We are delighted by our excellent performance in the InsuranceERM Awards," said Colin Holmes, Managing Director of Insurance Solutions at Moody's Analytics. "Our goal is to help insurers efficiently meet their actuarial, risk, and finance needs. These results reflect our continued progress and the overall strength of our insurance solutions."

"Moody's Analytics remains at the forefront of insurance risk and financial management technology, as evidenced by their five wins in this year's awards," said Christopher Cundy,

Managing Editor of InsuranceERM. “They continue to develop their offerings to help insurers navigate the changing marketplace and evolving regulatory regimes.”

[Solvency II Product of the Year](#) at the 2020 Risk Markets Technology Awards and the [Category Leader](#) distinction in a Chartis Research report evaluating vendors of IFRS 17 solutions were among more than 50 awards and industry accolades for Moody's Analytics in 2019.
