Moody's Analytics Named Category Leader for CLO Solutions in Chartis Report

NEW YORK, May 6, 2020 – Moody's Analytics, a global provider of financial intelligence, has earned the Category Leader distinction in a new Chartis Research report. [Technology Solutions for Credit Risk 2.0: Credit Risk Analytics, 2020; Market Update and CVA/CLO Solutions Vendor Landscape](#) evaluates 13 leading vendors of CLO solutions.

This recognition reflects the long-term commitment and significant investment that Moody's Analytics has made in the CLO market. From the formation of Moody's Analytics in 2008, it has had coverage of every structured asset class and has worked with many of the largest market participants. As a result the CLO product suite reflects a deep understanding of the structured finance community's needs. For example, different market participants need to access data and analytics in unique ways, and Moody's Analytics makes them available through several flexible solutions including a web portal, local or hosted APIs, data feeds, microservices, Excel® Add-In, and more.

“We are delighted to be recognized by Chartis for our CLO solutions,” said Bhargav Jani, Senior Director at Moody's Analytics. “Our rich content, developed over the past decade, sets us apart from other vendors in the CLO space. Our ability to deliver that content flexibly, suiting our clients' unique needs, is an even greater differentiator.”

The report's RiskTech Quadrant® for CLO solutions, pictured above, highlights each vendor's "Completeness of Offering" and "Market Potential." The report's separate Vendor Capabilities table evaluates the vendors on six specific capabilities. Moody's Analytics earned "Best-in-class" for three capabilities (collateral data analytics, pricing engine, and CPM support)—more than any other vendor.

Our [CLO Market Solutions](#) are a part of the Moody's Analytics suite of solutions for the structured finance market, which includes analytical platforms such as the [Structured Finance Portal](#) for investors and the [Ki™](#) solution for issuers of securitizations.

This suite of solutions also earned Category Leader status for Moody's Analytics in last year's Chartis Research report [Fixed-Income Technology Solutions, 2019 Market and Vendor Landscape](#).

[Learn more](#) about this new recognition, which adds to the company's growing list of [awards and accolades](#).
