Bureau van Dijk Repeats Win at RegTech Insight Awards

LONDON, June 2, 2020 – Bureau van Dijk, a Moody's Analytics company, has won Best Data Solution for KYC at the 2020 RegTech Insight Awards. This is the second straight year that Bureau van Dijk has won this category.

At the heart of this continuing recognition is Bureau van Dijk's Orbis, the world's leading entity database. Orbis now covers more than 365 million companies and a widening range of other entities, offering financial data, M&A deal information, adverse data, and more. Because Bureau van Dijk standardizes its information, clients can quickly and efficiently compare companies and entities, while its more than 1.2 billion ownership links help clients understand control and influence within organizations, including shareholder power.

"We're honored to be recognized again in the RegTech Insight Awards," said Bill Hauserman, Senior Director at Bureau van Dijk. "We have worked hard to make Orbis the go-to resource for company and entity data. With Orbis data, our clients are identifying risk, improving their compliance processes, and helping to prevent financial crime."

Bureau van Dijk recently earned the Category Leader distinction in a Chartis Research report that evaluates leading vendors of KYC/AML data solutions.

Moody's Analytics won another category at this year's RegTech Insight Awards, taking the award for Best Analytics Solution to Address Capital Requirements/Liquidity Risk.

Learn more about this new recognition for Bureau van Dijk, which adds to the growing list of awards and accolades for Moody's Analytics.
