Moody's Analytics Three-Peats in Two Categories at Risk Technology Awards

NEW YORK, August 12, 2020 – For the third straight year, Moody's Analytics has won the Risk Technology Awards for [Credit Data Provider of the Year](#) and [Wholesale Credit Modelling Software of the Year](#). These are two of our [seven](#) 2020 Risk Technology Awards spanning finance, accounting, regulatory, and credit functions.

"Our clients rely on Moody's Analytics for a fast and comprehensive view of their credit risk exposure," said Nihil Patel, Managing Director at Moody's Analytics. "The pandemic has accelerated their need to consider multiple forward-looking signals to assess credit risk. We continue to invest—in more asset class coverage, in alternative data sources, in machine learning that produces new analytics and insights—to ensure that our clients have all the information they need to address their most pressing business needs."

Extensive credit data and modeling capabilities feature in a number of Moody's Analytics solutions that contributed to these two wins:

- [Data Alliance](#) is one of the world's largest and most comprehensive data consortia. Its members share data across many asset classes and receive benchmarking metrics in return.
- [Orbis](#), from Bureau van Dijk, a Moody's Analytics company, provides information on more than 375 million private companies and other entities.
- The [RiskCalc™](#) credit scoring platform combines fundamental and financial market information into a predictive risk score for private firms.
- The [CreditEdge™](#) tool helps users assess the daily credit risk of public firms and sovereigns with a leading probability of default model and advanced analytics that cover more than 60,000 publicly-traded entities.
- Our [CAP™](#) model lifecycle management platform allows customers to combine Moody's Analytics credit data and tools with their own for analytics that are customized to the unique portfolio characteristics of their firm.

The [Risk Technology Awards](#) recognize outstanding vendors helping the industry in the fields of ALM, credit, operational risk, and enterprise risk management.

These wins extend our growing list of [awards and industry accolades](#).
