Bureau van Dijk Wins Again for Best Entity Data Solution

LONDON, December 10, 2020—For the third straight year, Bureau van Dijk, a Moody's Analytics company, has won Best Entity Data Solution at the Data Management Insight Awards.

We earned this continued recognition because of Bureau van Dijk's [Orbis](#) entity data solution. Orbis covers companies in every country with overall coverage that will soon surpass 400 million entities. Orbis also lets clients examine an increasingly wide range of entities—with financial data, M&A deal information, adverse media, and more—and makes clear how different entities are linked to each other.

Moving into 2021, Orbis will see the integration of data from two recent Moody's acquisitions: [RDC](#) and [Aquire Media](#). More adverse media and risk events in Orbis, along with more news and alerts, will contribute to quicker and more comprehensive third-party screening and onboarding. Aiding clients further, the data provided in Orbis now also includes credit risk scores which respond to changes in the economic environment.

"Helping our clients make better, faster decisions has become an even more urgent mission amid the continuing economic uncertainty," said Matt McDonald, Managing Director at Bureau van Dijk. "We are honored to help our clients navigate this challenging environment. We are also very pleased to win this award for a third consecutive year, as it reinforces Orbis' position as the leading entity database."
