Moody's Analytics Repeats as Data Provider of the Year in Regulation Asia Awards

SINGAPORE, January 13, 2021 – For the second straight year, Moody's Analytics has been named Data Provider of the Year at the Regulation Asia Awards for Excellence.

Several of our data solutions contributed to this win. While all of these solutions enable our customers to make better decisions, each solution has its own use cases and serves distinct segments.

CreditEdge™: Measure the credit risk of portfolios of listed firms and sovereigns. The Moody's Analytics CreditEdge solution helps organizations to assess the risk of default and credit deterioration consistently across public entities, sovereigns, and bonds from around the world. It combines our EDF™ (Expected Default Frequency) model with industry-leading analytics to provide early warning on listed exposures before losses occur.

Data Alliance: Contribute credit risk data and receive benchmarking data and analytical tools in return. Data Alliance is one of the world's largest collections of private credit risk data with more than 100 million financial statements representing 20 million firms and many asset classes. Data Alliance members can benchmark their internal portfolios against peers, to understand where risk in their portfolio is concentrated.

Orbis: The leading entity data solution. Orbis covers nearly 400 million entities across the globe. It also enables examination of an increasingly wide range of entities—with financial data, M&A deal information, adverse media, and more—and makes clear how different entities are linked to each other.

Structured Finance Portal: Access the right structured finance information, quickly and flexibly. Our Structured Finance Portal uses Moody's Analytics technology infrastructure to deliver unmatched data and analytics for all structured asset classes. Its flexible delivery enables customers to access data in whatever way works best for them, helping them find better structured investments, faster and more cost-effectively.

“The enormous breadth and depth of our data sets us apart from other vendors,” said Wael Jadallah, Managing Director at Moody’s Analytics. “When we connect these award-winning data solutions, our customers’ risk analysis is enhanced and new risk assessment possibilities are created. We’re honored to again win this award from Regulation Asia, and that our customers are relying on Moody’s Analytics data resources to help them make better, faster decisions during this challenging time.”

[Learn more](#) about the Regulation Asia Awards for Excellence, where Moody’s Analytics also won [Capital & Liquidity Modeling Solution of the Year](#).

These wins adds to the [industry recognition](#) earned by Moody’s Analytics, which includes a three-peat for [Credit Data Provider of the Year](#) at the Risk Technology Awards last June.
