Moody's Analytics Wins Five InsuranceERM Awards

LONDON, March 1, 2021 – For the second straight year, Moody's Analytics has won five categories in the InsuranceERM Awards:

- » [ERM End-to-End Solution of the Year](#)
- » [Economic Scenario Generator Software of the Year](#)
- » [Regulatory Reporting Software of the Year](#)
- » [Solvency II Solution of the Year](#)
- » [Stress Scenarios Software of the Year](#)

“Our insurance customers have had to address unparalleled, often unforeseeable changes in the last year. Throughout this period of uncertainty they have trusted Moody's Analytics to help them achieve their goals,” said Colin Holmes, General Manager of Insurance Solutions. “We're proud to have earned that trust and recognize that many other challenges lie ahead—including climate change and upcoming go-live for IFRS 17 and LDTI. As this recognition from InsuranceERM shows, our broad offering equips our insurance customers to be ready for whatever hurdles may arise.”

Moody's Analytics capabilities in [economic forecasting](#) help insurers to project and test financial outcomes. They are often used in tandem with our expertise in actuarial and credit modeling and our enterprise software to enable customers to assess their risks and anticipate the future.

As market conditions change, insurers need to monitor their solvency position more frequently, quickly, and with accuracy. We introduced the Moody's Analytics [SolvencyWatch™](#) solution last year to help them monitor their financial position, giving risk teams timely access to actionable information.

The pandemic has changed how vendors support and engage with their customers. In-person collaboration, previously typical, remains virtually impossible. Fortunately for Moody's Analytics, our “vendor-maintained” approach has been valuable to customers amid the continuing uncertainty. Because our methodologies are built directly into our software, implementation focuses on knowledge transfer—not customization.

“Moody’s Analytics continues to be a leader in the insurance risk and financial management space, as demonstrated by a second straight five-win showing,” said Christopher Cundy, Managing Editor of InsuranceERM. “Their offerings are helping insurers meet a range of business and regulatory challenges that have only intensified over the last year.”
