Cyber Risk Ratings by Bitsight in Orbis, Supply Chain Catalyst, Compliance Catalyst\(^2\) and Credit Catalyst\(^2\)
Introduce Cybersecurity into Your Integrated View of Third-Party Risk

As your organization expands its digital footprint and third-party ecosystem, it becomes increasingly vulnerable to cyber attacks. These attacks can create significant financial, technical, reputational, and operational risks for your organization. Your organization needs to understand its exposure to cyber risk, the impacts of a potential attack, and how to effectively mitigate that risk.

The challenge lies in finding an effective and intuitive way to measure, monitor, and mitigate these new risks by integrating them into risk management workflows across the business. Moody's Analytics has collaborated with Bitsight to solve this problem by integrating Bitsight's industry-leading cybersecurity ratings and analytics into Orbis, Compliance Catalyst, Credit Catalyst\(^2\), and Supply Chain Catalyst\(^2\).

Integrated Risk Assessment Enhanced with Cybersecurity Ratings

Moody's Analytics risk management solutions help organizations assess complex, interconnected risks and make more informed decisions by providing a holistic view of third-party risk across financial, sustainability, reputational, and operational dimensions. By partnering with Bitsight the leading cybersecurity analytics provider, Moody's Analytics complements its already robust offering with best-in-class cyber risk analytics to help identify, measure, and mitigate cyber risk.

Cyber Risk Ratings by Bitsight provide you with:

- **Data-driven Analytics:** Bitsight's ratings are powered by an objective approach that is regularly refreshed to account for changes in the cybersecurity landscape
- **Intuitive by Design:** Bitsight's analytics provide a concise way to understand an organization's cybersecurity risk and contextualize the implications of that risk
- **Robust Coverage:** In its Basic and Standard integrations, Bitsight provides approximately 250,000 ratings within Orbis and the Catalysts, and is working to continually expand its coverage. Full coverage is available via its Premium integration, where Bitsight has the ability to generate ratings on over 40 million companies
- **Meaningful Signal:** Bitsight ratings are the only cybersecurity ratings proven by third parties\(^1\) to correlate with the likelihood of a breach or ransomware incident

Bring Cyber Risk Monitoring to Your Workflows

Given the significant financial and operational consequences of a cyber attack, integrating cyber risk analytics into cross-business risk assessments is critical. These analytics can play a pivotal role in supply chain, credit, compliance, and insurance use cases. Bitsight integrations into Orbis and Catalyst are the easiest way to introduce cyber risk analytics into your existing integrated risk management workflows.

Bitsight cyber analytics are available for global entities via Orbis, Credit Catalyst\(^2\), Supply Chain Catalyst and Compliance Catalyst\(^2\).
