

Streamline customer onboarding and loan processing

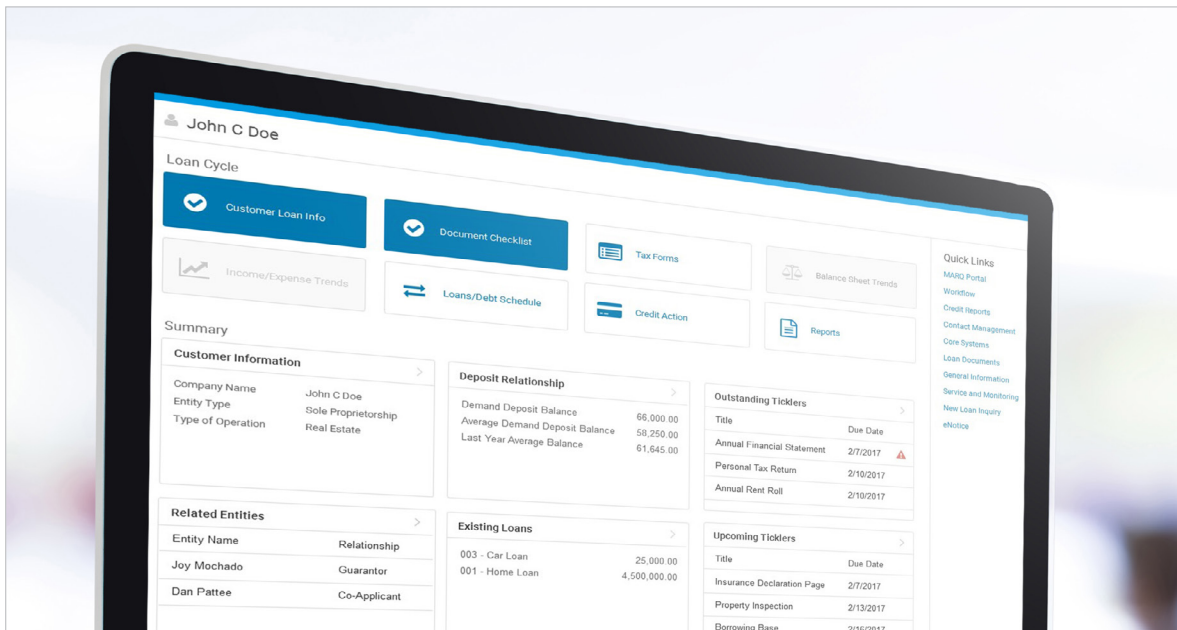

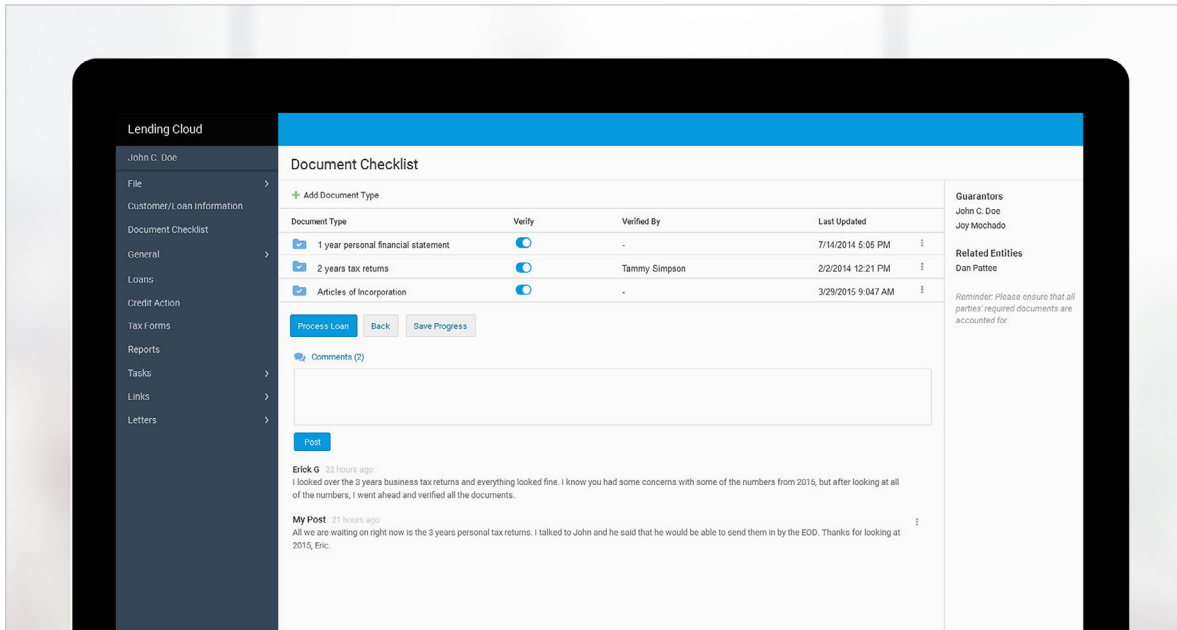

Lending Cloud's Lender Application helps speed up the lending process by enabling lenders to swiftly on-board customers and submit a loan package via a mobile device.

Using this simple, mobile enabled application lenders can efficiently gather and submit customer information and documents, while on-site or at the branch.

Mobile interface for an improved customer experience and an expedited loan application process

- » Complete the application process while on-site with your customers, supporting faster turnaround times for customer on-boarding and credit decisions.
- » Collect all required borrower data and documents necessary to process commercial loan requests, using the configurable application.

» Reduce administrative tasks and processing time via the simplified, user-friendly interface.

Obtain a quick access overview of borrower's details

Integrated business rules increase automation and consistency in the onboarding and application process

- » Create greater data and process consistency across branches and locations, through the centralized business-rules feature.
- » Auto-populate the application with data from core systems, reducing manual tasks and data entry errors.
- » Ensure the required customer documentation is identified and collected, using the automated document checklist feature; instantly uploads documents to Lending Cloud.

The Lender Application is an add-on module to Lending Cloud, a cloud-based lending solution that enables lenders to make better credit decisions faster, in a flexible and configurable platform.
