

Moody's Analytics SolvencyWatch solution empowers chief risk officers to meet the growing demands on the risk function. It offers effective monitoring of insurers' solvency metrics in a complex, volatile world.

Upgrade to a modern modeling and analytics platform for monitoring

- » Produces real-time updates of solvency metrics under the latest market conditions.
- » A user-friendly dashboard enables CROs to visualize the impact on metrics under changes to market and non-market life risks.
- » Powered by Moody's Analytics actuarial modeling capabilities, the Solvency Watch solution delivers the risk function with efficient modeling approaches for assets, liabilities, and out-of-model adjustments (for example, new business).
- » Gives CROs a narrative on analysis of movements to help stakeholders understand what is driving changes in key metrics.
- » Answers on-demand, "what-if" requests to provide more insight to C-level executives for crucial decision-making.

Empower the business through timely insight

- » Offers greater control of the monitoring process for CROs by reducing reliance on other business areas to produce solvency updates.
- » Removes the needs for frequent runs of existing model infrastructure, helping to cut costs and resources significantly.
- » Supports senior stakeholder decision-making with a business-oriented tool.
- » Enables businesses to take ownership through an off-the-shelf, customizable modeling and analytics functionality.
- » Empowers users with an easy-to-use, modern technology platform.
